# MARKET QUOTATIONS

## SPECIAL NOTICE!

For GARDEN SEED PRICES write for our  
SPECIAL QUOTATIONS

## SEED CORN!

Farmers are being asked to grow more corn due to a possible shortage of feed for the large numbers of livestock on farms. Seed dealers can help by selling only the best and highest-yielding hybrids.

### WE RECOMMEND:

1. KEYSTONE 38—Outstanding on both upland and bottomland soils—shows tolerance to corn borer—has enviable record in official state trials in Missouri, Illinois, Oklahoma, Arkansas and Colorado.
2. KEYSTONE 39 AND 43—Medium early-High-yielding—Excellent feeding corn—for rich soils where other varieties grow too tall for easy harvesting.
3. KEYSTONE 40 AND 42—Excellent Hybrids for upland and sandy soils. 42 is earlier than 40—very short supply!
4. KEYSTONE 44 and 44A—90 - 100 day Maturity makes more corn and bigger ears than any 90-day hybrid we have ever seen!
5. KEYSTONE 45—Highest yielding Hybrid in Missouri, Kansas and Colorado — short supply!
6. KEYSTONE 106W & 111W—Excellent, high-yielding white Hybrids.

ASK FOR PRICE LIST!

## LATE SEASON

Mother Nature can upset the best, well-planned farm operations and she has certainly done just that this year. Adverse weather conditions have prevented the sowing of spring oats in many areas; winter wheat and fall-sown pasture-grasses and legumes have been ruined in other areas; the spring planting season is behind schedule in almost every region in the United States.

Therefore, seed dealers can expect a good demand for the balance of the season for grasses and legumes as well as for seed corn and soybeans. Seed corn business should be exceptionally good since there is a definite "back-to-corn" trend this year.

We are prepared to make prompt shipment on most all farm seeds.

DON'T MISS SALES! ORDER NOW!

## SOYBEANS!

Farmers indicated early that they would plant less soybeans this year; however, present indications are that the complete 1950 crop will disappear before 1951 harvest begins. Many farmers will take this to be a sure sign of higher soybean prices for the 1951 crop and will actually plant more soybeans!

Seed dealers should maintain ample stocks of the following recommended varieties:

### OIL BEANS—

1. WABASH—The best oil bean on the market for Kansas, Missouri, and Southern half of Illinois, Indiana. Excellent for combining—very little loss even when combined late—about 9 days later in maturity than Lincoln.
2. LINCOLN—Outstanding, early-maturing oil bean—very high-yielding—very high oil content.
3. HAWKEYE—Earlier than Lincoln but, over 4-year period, yielded as well and oil-content was practically same as Lincoln—doesn't shatter as much as Lincoln.

### HAY BEANS—

Virginias, Black Wilsons and Cowpeas—all in very short supply.

ORDER NOW!

We quote to Dealers only, F. O. B. St. Louis, subject to market changes. Terms: Cash; no discount, subject to demand draft. We make an extra charge of 25c per package on orders for 60 lbs. or less when priced for full bags. Parcel Post orders 25c extra plus postage.

We warrant to the extent of the purchase price that seeds or bulbs sold or as described on the container within recognized tolerances and without further warranty, express or implied.
